**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-5 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Claim 1 recites, inter alia, a comparator for determining a normal load operation or a light load operation for the switching operation depending upon a converted voltage level of the IV converter; and a standby detection circuit for stopping the switching operation when the converted voltage level of the IV converter is higher than a standby detection upper limit voltage that is set to be higher than a predetermined reference voltage according to the light load operation, and resuming the switching operation when the stopping makes the converted voltage level of the IV converter lower than a standby detection lower limit voltage that is reset to be lower than the predetermined reference voltage according to the stopping of the switching operation.

The art of record does not disclose the above limitations, nor would it be obvious to modify the art of record so as to include either of the above limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Y. J. Han whose telephone number is 571-272-2078. The examiner can normally be reached on Mon-Fri 5:30am-2:00pm.
